

Potassium Product Line

Hydrite knows “K”alifornia

Hydrite’s potassium product line is formulated to optimize crop growth by providing the additional macronutrients soil cannot provide alone. Allow us to assess which products will be optimal for your crop growth and provide the support to ensure success.

Product Name	Analysis	Lbs/Gal	pH	Salt Index	Benefit
THIO 25-17™	0-0-25+17S	12.2	8.5	68	Provides vital nutrients - K and S, fortifies liquid starter and foliar fertilizers, and improves stress tolerance
Hydri-Gro Soluble K-32	0-0-32	12.6	12	65	Improves plant health and vitality, increases low pH soils, and adds carbon
Hydri-Gro Soluble K-30	0-0-30	12.2	12	62	Contains a sequestrant to help control scale caused by irrigation waters
Hydri-Gro Advance K-24	0-0-24	9.4	8	44	Fastest uptake of potassium, prompts healthy grow and better yields, and improves stress tolerance
Hydri-Gro K-Citrate 50%	0-0-23	11.7	8	40	Prompts healthy growth and better yields, contains a natural plant metabolite, and improves vitality
Potassium Sorbate 50%	0-0-15	9.7	10	25	Preservative against fungi and yeasts
Hydri-Gro DKP 50%	0-20-27	12.9	9.5	50	Highest phosphate and potassium in an effective, readily available liquid
Potassium Hydroxide 50%	0-0-42	12.6	>12	>100	Most cost-effective way to get K without adding chloride
Hydri-Gro 0-0-25H	0-0-25	10.7	>12	60	Low-cost K that provides humic acid to improve soil biology and composition
