

Sanitizer Labels

Did you know sanitizers CANNOT be reused? This is stated on the label. Sanitizers may be reclaimed and used as pre-rinse water but may not be reused for sanitizing purposes. It is a violation of the label to reuse sanitizers for sanitizing purposes.

Sanitizers used in automated systems may be used for general cleaning, but may not be reused for sanitizing purposes.

- Sanitizers are regulated by the EPA for registration, testing, and approval and FDA for the use of sanitizers on food contact surfaces.
- FDA reviews sanitizer formulations for safety and effectiveness. Non-rinse on food contact surfaces is permitted if used at the permitted concentration according to the label.
- EPA registers the sanitizer, and it is illegal to market a product using sanitizer claims without an EPA registration number. All sanitizers must be registered for use in each state.

FDA	EPA
<ul style="list-style-type: none"> • Regulates the use of sanitizers on food contact surfaces • Regulated under CFR 178.1010 Title 21 	<ul style="list-style-type: none"> • Regulates the registration, testing, and approval of sanitizers • Sanitizers are registered under the federal act (FIFRA) as a pesticide in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act
